

Laura Hart (1962 -)

Orchid Mirror

Circa: 2014

2014

United Kingdom

Glass metal and mirror

10 x 120 x 120 cm (3⁷/₈ x 47¹/₄ inches)

Mounted kiln formed glass flowers on mirror, back lit with branch. Design service, ask for bespoke versions, sizes and finishes.

To capture the delicate detail of each flower, these pieces are subjected to numerous firings to incorporate the many hand cut fragments of glass. Unlike most flowers that fade and die, these have resilient beauty!

Laura Hart creates unique, bespoke and limited edition art and architectural glass works. As both artist and designer, Hart unites twenty-first Century 3D design applications with age-old traditional glass-making techniques. Her delicate and highly detailed flowers follow a lifelong passion for flowers. Other Flowers includes poppies and lilies, please contact the gallery for more information.

In her own words:

‘Inspired by my love of flowers, particularly orchids, my sculptural flower collections combine several glass fusion techniques. Emulating the delicate, ethereal translucency of flower petals, I recreate the

living structure as it forms in nature, so that backlighting reveals every gossamer detail through the layers in a diffused spectral glow.'

Literature:

Unique

Artist description:

The Hart Glass Studio is situated in rural Suffolk where she creates unique, bespoke and limited edition art and architectural glass works. As both artist and designer, Hart unites twenty-first Century 3D design applications with age-old traditional glass-making techniques. Her delicate and highly detailed flowers follow a lifelong passion for flora and the rural landscape with a desire to capture it's natural elegance.

In her own words:

'Inspired by my love of flowers, particularly orchids, my sculptural flower collections combine several glass fusion techniques. Emulating the delicate, ethereal translucency of flower petals, I recreate the living structure as it forms in nature, so that backlighting reveals every gossamer detail through the layers in a diffused spectral glow.'
